

Course Information							
Course Code	EN395	*	Credit Hours	32	*	Credits	2
* Course Name	2						
	Research Methods in Linguistics (2)						
(Course Type)							
Target Audience							
(Language of Instruction)							
* School	School of Foreign Languages						
Prerequisite							
Instructor			(Course Webpage)				
* Description							
* Description	<p>This course has two principal aims: first, to help students become more capable, critical readers of research in linguistics; second, to provide students with a strong hands-on experience in employing the rationales and methods used in qualitative and quantitative research. The course follows the structure of a research project and focus on the practical steps involved in carrying out in experimental studies such as sampling, experimental design, statistical analysis, research report writing. Topics may include research in the areas of phonetics, syntax, semantics, pragmatics, language acquisition, psycholinguistics, sociolinguistics and language teaching, etc.</p>						
Course Syllabus							

<p style="text-align: center;">*</p> <p style="text-align: center;">(Learning Outcomes)</p>	<p>When the course is completed the student should</p> <ol style="list-style-type: none"> <li>1) have considerable skills in applying and explaining different linguistics research methods for analysis of language and speech from different point of views</li> <li>2) demonstrate the ability to critically discuss methods in research design in relation to different linguistic research questions</li> <li>3) demonstrate the basic skills in collecting research data and performing statistical analyses.</li> <li>4) have the ability to interpret research results.</li> <li>5) have the ability to write a research report.</li> </ol>					
<p style="text-align: center;">*</p> <p style="text-align: center;">(Class Schedule &amp; Requirements)</p>						
	Population samples	2				
	Surveys and interviews	4				
	Experimental research design	4				
	Experimental paradigms in psycholinguistics	2				
	Sound recordings: acoustic and articulatory data	2				
	Descriptive statistics	2				
	Basic significance testing	2				
	Variation analysis	4				
	Multivariate statistics	4				
	Acoustic	4				

	analysis					
	Constructing and supporting a linguistics analysis	2
